*Changes release 250:*

<i>Item</i>	<i>Change</i>	<i>B/I/X</i>	<i>Description</i>
250-1		B	<b><i>Error in the location detection prevents drivers from changing status.</i></b>  This new release will fix the issue where the device does not know its location, giving the user a manual option to type, but this does not work either. It is crucial, for the correct operation of the app, that drivers keeps the location settings always on.
